

6516206189.txt

XM Satellite Radio is of great benefit to me. I have never been as pleased with a new information technology as I have been since subscribing to XM Satellite Radio.

Therefore, I support satellite radio and oppose HR 4026.

More than any other communications media, satellite radio provides variety and quality of communications that are unmatched by any other media. I understand that the National Association of Broadcasters is trying to limit the services of XM Satellite Radio. This should not be allowed to happen.

Please oppose HR 4026.

Respectfully submitted.

Don Kirchoff
